- Other Fuel

*Although ‘Avoided Environmental Compliance Costs’ is one category in the DSESP, some jurisdictions and benefit-cost analysis models further detail this category. If the category is gray, your state does not account for any such impacts. If the category is blue, your state accounts for at least one impact in this category.

Use the [Database of State Efficiency Screening Practices (DSESP)](https://nationalefficiencyscreening.org) to view state energy efficiency cost-effectiveness testing practices and guidance documents.
